

## An abundance of textile inks to choose from. Textile pigment ink and sublimation dye ink can be loaded at the same time

Depending on the type of application and fabric, 5 different type of inks can be choose from\*1. It is now possible to choose textile pigment ink (TP400) and sublimation dye ink (Sb420) at the same time\*2, making possible to print with only one machine on cotton, hemp, polyester and similar textile.

Ink type	Product name	Color	Features	Applicable fabric
Sublimation dye ink	Sb420	Bl, M, Y, K, Lbl, Lm	Sublimation ink for direct printing. No transfer paper is required.	Polyester
Disperse dye ink	Dd400	C, M, Y, K, R, Gray, Violet, Pink	Inks are fixed by heating and have high durability.	Polyester, nylon, acetate, and other fibers
Textile pigment ink	TP400	C, M, Y, K, Bl, R, Lk	Simple post-printing process. No steaming, washing and drying processes are required. Inks are fixed by only heating.*3	Cotton, hemp, and other fibers
Reactive dye ink	Rc400	C, M, Y, K, Bl, R, Or, Lk	Inks produce vibrant colors, reproduce a wide gamut of colors, and have water resistance, light-fastness, and rub-fastness because of dyestuff molecule bonding with the fibers.	Cotton, hemp, silk, rayon, and other fibers
Acid dye ink	Ac400	C, M, Y, K, Bl, R, Or, Lk	Inks produce vivid and brilliant colors on animal fibers and synthetic protein fibers such as nylon.	Wool, leather, silk, nylon, and other fabrics

\*1 Please select an ink type depending on your intended use. The ink type cannot be changed after installation. With the hybrid function two types of inks (textile pigment and sublimation dye ink) can be loaded.

\*2 Available from June 2017. Each textile pigment ink (TP400) and sublimation dye ink (Sb420) has 4 colors (C,M,Y,K)

\*3 Depending on the type of printing, steaming and washing may be needed.

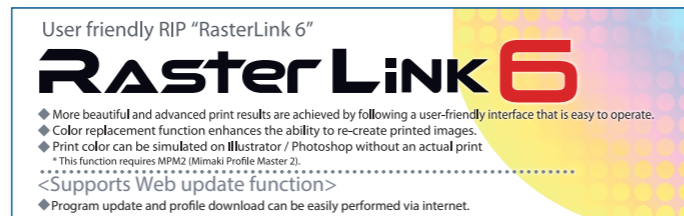

## Software

TxLink3 Lite or RasterLink6 is bundled according to user's request.

Professional software RIP for multi color separation  
**Software RIP for Multi Color Separation**  
**TxLink3**

- Spot color can be assigned to each color on separation plates.
- ICC profile creation from CMYK + spot colors.
- Color replacement on raster data
- A variety of paneling functions, including step-and-repeat layout, which are useful for textile designing.

User friendly RIP "RasterLink 6"

### RasterLink6

- More beautiful and advanced print results are achieved by following a user-friendly interface that is easy to operate.
- Color replacement function enhances the ability to re-create printed images.
- Print color can be simulated on Illustrator / Photoshop without an actual print
- \* This function requires MPM2 (Mimaki Profile Master 2)

<Supports Web update function>

- Program update and profile download can be easily performed via internet.

## Specifications

Item	Tx300P-1800
Printhead	On-demand piezo head (4 in-line printheads)
Print resolution	360 dpi, 540 dpi, 720 dpi, 1,080 dpi, 1,440 dpi
Maximum print width	1,920 mm (75.6 in)
Maximum media width	1,920 mm (75.6 in)
Ink	Type/Color
	Sublimation dye ink: Sb420 (Bl, M, Y, K, Lbl, Lm)
	Disperse dye ink: Dd400 (C, M, Y, K, R, Gray, Violet, Pink)
	Textile pigment ink: TP400 (C, M, Y, K, Bl, R, Lk)
	Reactive dye ink: Rc400 (C, M, Y, K, Bl, R, Or, Lk)
Acid dye ink: Ac400 (C, M, Y, K, Bl, R, Or, Lk)	
2L Ink pack	
Media thickness	1.0 mm or less
Rolled media weight	40 kg (88 lb) or less Please note that the above maximum weight applies on a printed roll including ink weight.
Certifications	VCCI class A, FCC class A, ETL UL 60950-1 CE Marking (EMC, Low voltage, Machinery directive, and RoHS), CB, REACH, Energy Star, and RCM
Interface	USB 2.0 Hi-speed/Ethernet 1000BASE-T
Power supply	Single-phase AC100-120 V / AC200-240 V
Power consumption	AC100 V: 1.44 kW / AC200 V: 1.92 kW
Operational environment	Temperature: 20-30°C (68-86°F) Humidity: 35-65% Rh (Non condensing)
Dimensions (W x D x H)	3,200 x 965 x 1,857 mm (126 x 38 x 73 in)
Weight	255 kg (562.2 lb)

●Some of sample images in this brochure are simulated. ●Specifications, designs and dimensions stated in this brochure may be subject to change without notice (for technical improvements, etc). ●All product and company names in this brochure are trademarks or registered of the respective companies. ●The printhead ejects extremely fine dots for printing, and therefore printed colors may vary after replacing the printheads. ●When using multiple printer units, printed colors would be different slightly because there is a slight difference among those units. ●Depending on image files used for printing, the print quality would be affected when printing in a low-resolution mode with the lowest number of passes. ●The specifications described in this catalogue are as of April 2019.

Direct Textile Inkjet Printer

# Tx300P-1800

**Mimaki**™

## New printhead allows printing on various types of textile

While printing on raised fiber surface textiles, a high head gap setting is required to prevent contact between the printhead and the nap. In conventional models, such gap conditions reduce the accuracy of ink droplet placement. However, the new printhead ejects ink droplets at high speed to maintain the straightness of the droplet direction, and accordingly accurate ink droplet placement is achieved. This enables high-quality printing on napped textiles.

## Reliable textile feeding mechanism ensures stable printing

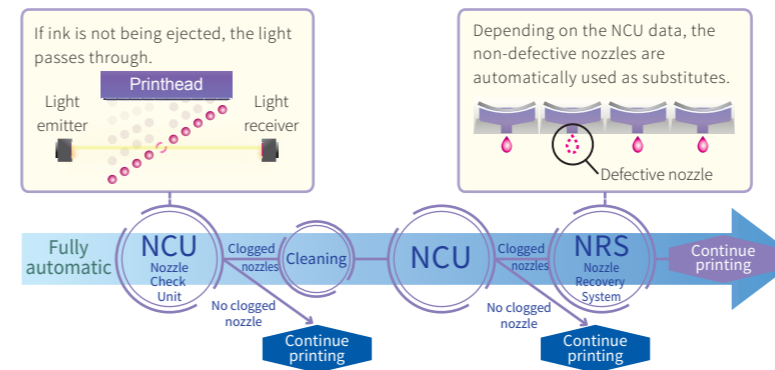

Stable textile feeding and transportation are crucial for direct textile printing. The tension applied to the textile during printing is varied according to changes in the outer diameter of the front and rear rolls. The Tx300P-1800 monitors the applied tension and uniformly applies the optimum tension using the front and rear tension bars. Thus, high-quality printing is achieved during high-speed printing or even when using a large textile roll.

## Uninterrupted printing solutions

### Continuous operation support pack minimizes the downtime

The Nozzle Check Unit (NCU) detects nonfunctioning nozzles and automatically cleans them. If the nozzles fail to operate after cleaning, defective nozzles are replaced by non-defective ones until a technician arrives, and printing is continued. This feature enables uninterrupted print operations and continuous productivity.

### Standard features of MBIS3 and UISS deliver continuous printing for a long time.

Large two liter ink packs are installed in MBIS3<sup>1</sup> for long-time continuous printing to reduce operating cost.

As soon as one ink container is empty, UISS<sup>2</sup> automatically provides ink from another container without any interruption to printing. These systems supply ink continuously to ensure unattended continuous printing.

Create your own design fabric!

Owing to the widespread use of the Internet, the number of orders for personalized/customized design products has been increasing. To meet the latest market needs, Mimaki developed the Tx300P-1800. This entry-level model fits perfectly in places with limited floor space, such as design studios or school facilities. The Tx300P-1800 delivers high-quality printing on a wide range of textiles.

- Eye-catching soft signage
- Seat fabrics
- Durable printing is fit for outdoor recreation equipment
- Luxury apparel

## Mimaki's print technologies

### Mimaki Advanced Pass System 4 (MAPS4) reduces banding

Mimaki's unique anti-banding technique MAPS4 is an advanced version of MAPS3. To prevent banding, swath boundaries are overprinted, whereas boundaries prone to banding are printed with fewer ink droplets.

### Superior inkjet technology

Mimaki's superior inkjet technology accurately places the ink droplets without losing their perfect circularity. This ensures that texts, lines, and edges are clearly and sharply printed.

## Maximum print speed (66 m<sup>2</sup>/h) \*achieves high productivity

The Tx300P-1800 optimizes the printing speed and quality to produce the desired print results. For this purpose, it provides a wide range of printing modes, from the draft printing mode (which operates at the maximum speed of 66 m<sup>2</sup>/h) to high-quality printing mode.

\*When printing with Sb420 dye sublimation ink. DD400, TP400, Rc400 inks cannot print in draft mode.
