TS-BASE

Description The TS-Base is a great, economical heat press that works in the shop or on the go at events for on-demand printing. The TS-Base is easy to operate with a digital time and temperature readout and over-the-center pressure adjustment. The upper flotation platen provides a flat, even surface. Used in conjunction with a heat transfer pillow there's nothing you CAN'T print! The TS-Base is ideal for individuals who are just starting out in the industry, as a second press for home or the shop, or as a travel press that you take to live events like car shows, dance competitions, cheer events and more for complete on-demand heat printing and personalization!

Technical Data	Power	1800 W
	Voltage	220 V
	Weight	30 kg
	Plates dimensions	38x38 cm
	Max temperature	221°C

The TS-BASE machine, as it is equipped with electrical parts operating at a voltage between 50 V and 1000 V, is subject to the Low Voltage Directive 2014/35/UE (formerly 2006/95/CE) and the Electromagnetic Compatibility Directive 2004/108/CEE.

Since there are no motor-driven moving parts, as the movement of closure and opening of the plates is controlled by hand, the TS-BASE does not come within the field of application of the Machine Directive 2006/42/CE. Nevertheless, the design and construction of the TS-BASE has been made in compliance with the essential safety requisites foreseen by Directive 2006/42/CE.
