DIMENSE

2019

SAMPLES CATALOGUE

Dimense™ is a 3D digital wide-format printing technology. It allows designing unique surface structures and color combinations, to create one-of-a-kind interior solutions.

In the times when everyone wants to stand out from the crowd, bespoke wallcoverings are very much sought after. Digital printing has made it possible to print small batches of wall murals, however, the structure has been limited to random and repeated pattern. Dimense™ takes it a leap forward – now structure does not have to be limited to a certain texture, it can be printed on-demand. It brings wallpapers to a totally new level – now every single wallpaper can have absolutely unique structure. Depending on the design idea, the structure may or may not match the printed picture.

Dimense media is available in matt, pearlescent, suede, silver and gold options. Each of them allows to obtain different results and effects, for example, metallic looking surfaces.

All materials used in printing Dimense wallpapers are eco-friendly and totally harmless. Dimense media is PVC-free and phthalate-free, it contains no liquid components, like plasticizers or solvents, thus is completely ecological and odor-free. It has a non-woven base, thus is easy to apply and remove. The width of the print can be up to 1,6 meters, so it is possible to decorate the wall with very few seams. Dimense inks are latex based, thus the printed surface is extra washable, scratch resistant and has very good light fastness.

This sample catalogue showcases some examples of Dimense 3D digital wallpaper designs. Any featured design can be ordered as is, or it can serve as an inspiration for you to create your own bespoke Dimense 3D digital wallpaper design – possibilities are endless.
